

Pre-Anesthesia Precautions 麻醉前注意事項(英文)

The anesthesiologists and anesthetic nurses will maintain your optimal physiological conditions during the surgery in addition to possibly reduce the side effects likely to occur from the anesthesia.

Information you should tell the anesthesiologist

- Medical history
- Operation history
- Anesthetic history (personal and family)
- All medicine you take currently
- Any allergy or adverse drug reaction
- cigarette smoking or alcoholic drinking habits
- Time since fasting.

Precautions for Hospitalization

- Keep your valuables at home.
- Bring insurance documents (if any) and national insurance card.
- Bring all examination reports, X-ray film, and any other medical documents you own.

If you are admitted, you should

- Bring your personal cosmetics supplies, bathing robe, pajama, and slippers.

If you are outpatient, you should

- Wear comfortable clothes.
- Make sure an adult who can be responsible for taking you home can come to the hospital.
